

Picturing Physics

If you've ever heard of Sir Isaac Newton, you can thank an apple. Newton was an English scientist and mathematician in the 1600's. According to a legend, the young Newton saw an apple fall from an apple tree. He thought about the accident and figured out an important scientific principle. It's known as Newton's third law of motion.

- Directions:**
1. Read about Newton's laws of motion from pages 120-121, 124-126, and 134-135 in the textbook.
 2. Define each law.
 3. Draw a comic strip illustrating each of Newton's laws.
 4. Explain how each cartoon demonstrates the laws.

Newton's First Law of Motion states that...

--	--	--

Explanation of Cartoon: _____

Name _____ Date _____ Period ____ Team _____

Newton's Second Law of Motion states that...

--	--	--

Explanation of Cartoon: _____

Newton's Third Law of Motion states that...

--	--	--

Explanation of Cartoon: _____
